

CI Lab Manifesto

We Are ...

- ... a small group of **advanced** and enthusiastic contacters who have a genuine intention for exploration.
- ... committed to go **deeper** than what is revealed solely on the surface for the untrained eye.
- ... actively **engaged** in a researching mindset and pro-actively share our results with the others.

We Do ...

- ... explore in an egalitarian way **together**, without a dedicated leader but a facilitator-organizer.
- ... regularly **attend** to a lab happening once or twice a month in a studio in Amsterdam to maintain group cohesion.
- ... frequently **share** during a lab, contributing our insights to the group to weave a focus-topic together.

We Chat ...

- ... about anything related to the **research** of CI.
- ... to clarify anything about the **organization** of the labs.
- ... only when given it a thorough thought about its **relevance**.
- ... **not** about **advertisements** of any sort of events; use Facebook.
- ... **not** about your favorite cat/food **pictures**; use Instagram.
- ... **not** about our **emotional** agony; use a therapist.
